Market dynamics have shifted in the Boulder apartment market in the past year. While both 2021 and 2022 were record years in terms of demand, absorption colled in 2023. After logging double-digit annual rent growth, landlords and property managers have pulled back on rents in recent months to spur demand.

The Boulder pipeline remains active with 2,400 units under construction, and the market is still likely to feel some supply pressure over the next few years as these projects deliver. Vacancies are projected to rise above pre-pandemic averages by next year. The new supply is

concentrated in Longmont and Northwest Boulder County.

Boulder has attracted investors in the pandemic era because it is less vulnerable to economic upheavals due to its diverse and highly skilled workforce, as well as the University of Colorado Boulder and government labs offering steady employment in the community. High occupancy rates and outsized rent gains in the recent past have generated high returns for apartment owners. Investment volume is projected to cool this year due to capital market volatility.

KEY INDICATORS

| Sales Volume | \$242M | \$138.2M | N/A | \$568.5M | 2015 Q2 | \$6.1M | 2010 Q1 |

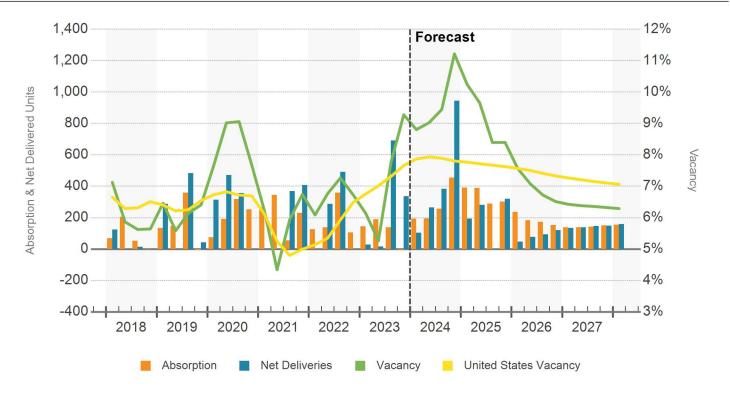

Supply-driven pressure in the Boulder metro contributed to a rise in vacancies in the past year, which have reached 8.8%. The vacancy rate is projected to continue rising in the near term with a number of projects slated for delivery in the coming year. Vacancies are rising fastest in the 4 & 5 Star segment, which have reached 12.6%. Vacancies are projected to remain elevated in the luxury category in 2024 due to the active pipeline. The 3 Star middle tier market has the lowest vacancy rate at 5.0%. The affordable 1 & 2 Star segment currently has a

vacancy rate of 5.8%.

Steady employment and prospects for growth have given developers confidence. Boulder is home to major employers including Google, which has made a massive expansion into the metro. Google opened its \$130 million Pearl Place campus in 2017 that housed 1,500 employees before the pandemic. The company recently purchased RÊVE Boulder, located across the street, to serve as an extension of its existing campus.

OVERALL & STABILIZED VACANCY

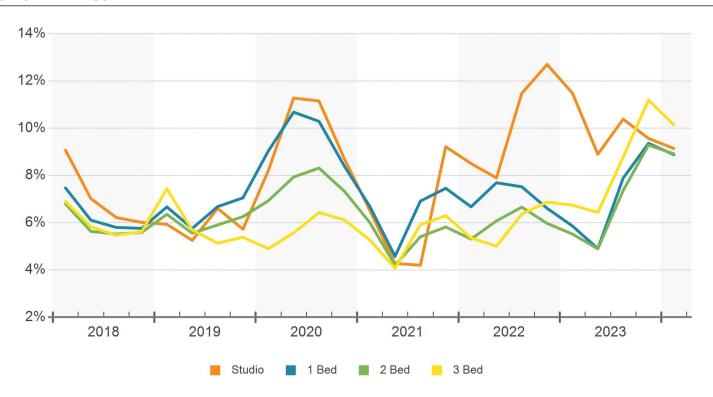

VACANCY RATE

VACANCY BY BEDROOM

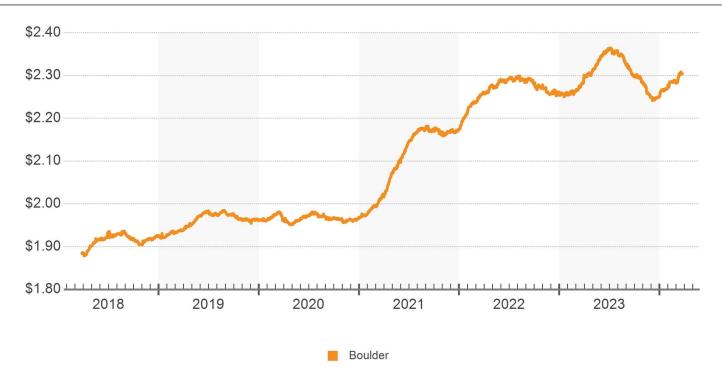

At roughly \$1,970/unit, the average rent in Boulder is about 20% above the national average. While rents in Boulder are higher than in surrounding areas, they are still at a considerable discount relative to coastal cities.

Rents have swiftly downshifted in the past year. CoStar's daily rent series, powered by Apartments.com, shows annual rent growth decelerating from 11.8% at the end of 22Q1 to a current year-over-year figure of 0.2%.

3 Star properties now hold a marginal lead in rent growth, increasing by 0.1% annually. 4 & 5 Star rents have been most impacted by an active pipeline, and rents in these luxury properties contracted by -0.2% annually. The active construction pipeline that will deliver mainly high-end product over the next several years will continue to put downward pressure on rents in this segment of the market. Concessions are historically rare outside of new construction, but one month of free rent is standard in communities during the lease up phase.

After years of controlled development, the pipeline has rapidly expanded. Roughly 2,400 units are underway throughout the metro area, which will expand the local apartment market's inventory by 11.3%. An additional 1,100 units have delivered in the last 12 months.

In the eco-conscious communities in Boulder, sustainable urban development is paramount. Newer projects in the city of Boulder itself are constrained by a height-limit ordinance restricting buildings to no more than 55 feet to prevent blocking views of the Rocky Mountains. Additionally, the city of Boulder allows

housing stock to expand by only 1% per year, with exemptions for affordable housing. Developers attempting to build in Boulder will continue to have to navigate these restrictions for the foreseeable future.

The majority of development underway has shifted to Longmont where building restrictions are more relaxed. Indianapolis-based Thompson Thrift is delivered one of the largest apartment community in Longmont. The 336-unit garden-style project, named Notch66, delivered in late 2023 at 2514 Main St and Ute Highway.

Boulder has attracted investors who have been priced out of core gateway markets, but high interest rates are impacting deal volume. Trailing 12-month sales volume amounted to just \$242 million, lagging the five-year annual average of \$227 million.

Southwest Boulder County leads the market in sales activity, although deal volume here can vary widely from year to year given the submarket's low stock. A major deal closed in April 2023, boosting annual transaction volume. Evergreen Development Co sold the 287-unit multi family community, Savanna Nine Mile in Lafayette, Colorado for \$108 million or \$367,307 per unit. The community features one- and two- bedroom units ranging from 600 to 1,283 SF. Rents range from \$1,845 to \$2,725/unit.

In Central Boulder, investment activity in the last year has mainly shifted to deals involving smaller value add assets. A 10-unit 2 Star community at 2460 9th Street sold for \$3 million (\$300,000/unit) in January 2023. The building was delivered in 1956 with brick masonry construction and it offers 10 surface level parking spaces. The property sold as an investment, to a private owner through a private sale with no commercial broker representation. In May, a 6-unit 2 Star community at 1216 Pleasant Street sold for \$2.2 million (\$360,000/unit). The higher price per unit was due to the building's location in the University Hill area. The asset previously sold in April 2021 for \$1.67 million (\$277,500/unit).

Boulder developed into a dynamic economy in the past decade. A number of different industries have contributed to this growth, but high tech companies continue to grab most of the headlines. Tech companies have flourished in Boulder thanks to a well-developed infrastructure that stems from a synergistic relationship with the University of Colorado. Firms looking to hire have no shortage of qualified graduates from which to choose.

The amount of flex space in Boulder speaks to how important the tech sector is to the economy. Flex space, which draws demand from high-tech tenants needing both office and R&D space, represents just over half of the entire industrial stock. San Jose is the only other metro in the country where flex space comprises at least half of the industrial stock.

Several Fortune 500 companies also help solidify the

economy, including GE, IBM, Lockheed Martin, and Qualcomm. Google, which employed three or four hundred employees in the metro earlier in the cycle, now employs upwards of 1,000 and is actively expanding with the completion of its 200,000-SF campus. The firm bought the first phase of its campus in a record-breaking deal, and further made its commitment to the area clear by announcing plans to move forward with a 100,000-SF expansion of the campus.

Amazon, Uber, and Twitter also have a presence in the metro, and the high tech backbone should continue to be an important source of high-paying job growth in Boulder. Of course, there's always the possibility of being overly exposed to a certain sector, and high tech and information jobs do account for about 20% of office-using employment, in the neighborhood of San Francisco's level.
